

SUBJECT INDEX

- Acanthamoeba* sp.
in human feces
frequency, 61
pathogenicity for mice
(experimental study), 67
- Acid
L-ascorbic acid in bread products
containing polysorbate 60 or 80,
determination, 133
- Adenovirus infection
antibodies
neutralizing test, 179
- Aflatoxin
aflatoxins B₁, B₂, G₁, G₂, determination
in peanut, 101
in peanut flour, 101
aflatoxins M₁, M₂, determination
in cow milk, 87
- Amoeba
free-living amoeba
in human feces
frequency, 61
isolation, 67
- Antibacterial substances
in spinal fluid
research method, 155
- Antibodies
anti-*Cysticercus cellulosae*
in normal population, 25
in psychiatric patients, 25
- Bacteria
aerobic bacteria
isolation from blood culture, 115
facultative anaerobic bacteria
isolation from blood culture, 115
enteropathogenic bacteria
isolation from feces, 161
- Bacterial infections
prevalence, São Paulo municipality,
Brazil, 115
- Birds, wild
blood parasites
São Paulo, Brazil, 41
- Bread products
L-ascorbic acid determination
polarography, 133
- Campylobacter jejuni*, 161
- Cell line
calf kidney cell (RV-IAL)
susceptibility to virus, 55
- Cysticercosis, 25
Cysticercus cellulosae, 25
- Dyes
Red beet dye
nitrates, determination, 109
- Enteropathogenic bacteria
isolation from feces, 161
- Escherichia coli*, 161
- Feces
content of pathogenic bacteria, 161
- Food contaminants
phosphin residues determination, 149
- Hepatitis A, B
B, T lymphocytes, frequency, 29
- Leptospirosis, human
antibodies in serum, determination
passive hemagglutination test, 35
immunodiagnosis, 35
- Listeria monocytogenes*, serotypes
prevalence in Brazil, 125
- Listeriosis, human, Brazil, 125
- Lymphocytes B, T
in hepatitis, frequency, 29
- Meningitis
bacteriological diagnosis, 155
- Milk (cow milk)
aflatoxins B₁, B₂, G₁, G₂, determination
high-performance liquid chromatogr., 87
aflatoxins M₁, M₂, determination
high-performance liquid chromatogr., 87
antibiotics, detection, 19
antiseptics, detection, 19
inhibiting substances, detection, 19
microbial contaminants, detection, 19
- Mineral water
see Water, mineral
- Naegleria* sp.
in human feces, frequency, 61
pathogenicity for mice
(experimental study), 67
- Nitrate
in mineral water, determination, 141

- Nitrates
 - in Red beet dye, determination, 109
 - in sugar-beet, determination, 109
- Parasites
 - blood parasites
 - in wild birds
 - São Paulo, Brazil, 41
- Peanut
 - aflatoxins B₁, B₂, G₁, G₂, determination
 - high-performance liquid chromatogr., 101
- Peanut flour
 - aflatoxins B₁, B₂, G₁, G₂, determination
 - high-performance liquid chromatogr., 101
- Phosphin residues
 - in foods, determination, 149
- Proechimys iheringi*, 47
- Red beet dye
 - nitrates, determination, 109
- Salmonella*, 161
 - serotypes
 - frequency in São Paulo, Brazil, 1
- Shigella*, 161
- Spinal fluid
 - antibacterial substances
 - research method, 155
- Sugar-beet (*Beta vulgaris*)
 - nitrates determination, 109
- Taenia solium*, 25
- Triatoma infestans*
 - laboratory rearing
 - blood meal and nymphal growth, 73
 - fertility, 81
 - survival, 81
- Trypanosoma (Herpetosoma)*, 47
- Virus
 - cultivation in calf kidney cell line (RV-IAL), 55
- Water, mineral
 - nitrate determination
 - cadmium-column method, selective
 - electrode method, comparison, 141
- Yersinia enterocolitica*, 161
